

Thin Rubber Cow Blocks

VT37062

Recommended for minor lameness to offer relief from weight-bearing stress.

- Wear resistant
- Suitable for polyurethane or acrylic adhesive
- Recommended for minor lameness
- 3/8" thick x 4.75" long
- 75 blocks per box

BENEFITS

- Thinner than Rubber Cow Block (VT46133)
- Unsurpassed traction and comfort on wet and slippery surfaces
- 3/8" thickness offers reduced elevation and less limb stress
- Unique surface pattern provides increased bonding surface with hoof
- Can be combined with Rubber Cow Block (VT46133) for added elevation

Rubber Cow Blocks

VT46133

Made from a high quality flexible rubber material, these blocks are excellent in high slurry environments, as well as cold/damp weather.

- Wear resistant
- Suitable for polyurethane or acrylic adhesive
- Added cushion and traction
- Made from a high quality flexible rubber material
- 3/4" thick x 4.75" long
- 50 blocks per box

BENEFITS

- Provides superior traction on difficult surfaces
- Supports both heel and toe
- Excellent block for high slurry environments

XL Hoof Block

VT46138

Excellent option for larger animals in a high-wear environment.

- High-wear resistant
- Suitable for polyurethane or acrylic adhesive
- Made from a more rigid material than rubber blocks
- 3/4" thick x 5.5" long
- 50 blocks per box

BENEFITS

- More sole coverage than traditional block
- Supports both heel and toe
- Unsurpassed traction and comfort on wet and slippery surfaces

NEW! Rubber Cow Block 2.0

VTFLEXS, VTFLEXL

Excellent bonding, traction and comfort for the cow.

- Positioning and anchoring points
- Firm outer edge for wear resistance of the block
- Durable rubber composite
- 2 sizes: Small (3/4" thick x 4.75" long) and Large (3/4" thick x 5.5" long)
- 20 blocks per box

BENEFITS

- Optimum glue distribution between the block and the claw
- Ease of movement through cushioning and flexibility of the block when walking
- Ergonomically shaped to the bovine claw
